

## Phoenix Skool Buses LLC

After serving in the Navy for six years as nuclear engineers, partners Sabrina Lyon and Jordan Bosserman founded Phoenix Skool Buses LLC where they make affordable, environmentally friendly “skoolies”, or school buses converted into functioning RVs and tiny homes. These skoolies are perfect for those who are looking to downsize or for those who want an affordable and unique vacation experience. Sabrina and Jordan offer six tiers of completion for skoolies, and each skoolie is customizable. Customers can choose their style, floor plan, bed size, appliances, and can even have their skoolies made to work off the grid. They have also expanded the business to include vans and shipping containers.

PeopleFund was able to provide a jumping off point for Phoenix Skool Buses with funding. Co-founder Sabrina Lyon said PeopleFund “has continued to be a strong, supportive resource for us. We were so happy to find a resource for veterans after completing our time in the Navy and we have continued to enjoy and appreciate all the hard work that PeopleFund has done for us.”

The pandemic forced Sabrina and Jordan to adapt to the changing environment, and PeopleFund was able to provide them with a Paycheck Protection Program (PPP) loan. Sabrina stated “Our business has survived because of the PPP loan, simply put. Maintaining a small business through a pandemic has been no easy task, but the PPP loan has given us peace of mind in these trying times.”
